

BPS-LP-0022 PRE-SEPARATOR

EQUIPPED WITH A LONGOPAC BAGGING SYSTEM

The BPS-LP-0022 pre-separator can triple the lifetime of the filters because it captures 80-90% of dust. It also prevents reduction in the suction performance of the dust collector.

It can be used in between one of our machines and a big size Blastrac dust collector. It is specially designed for jobs with a lot of dust. It has little loss of airflow and doesn't use any power.

The BPS-LP-0022 is equipped with a Longopac system, which is easy to mount. It is equipped with an Up & Down system for easy transport (low position for transport & high position for work).

- 87 kg
- Working Position 891 mm | 700 mm | 1.961 mm
Transport Position 891 mm | 700 mm | 1.581 mm
- Ø100 mm
- Endless Bagging System | Adjustable capacity up to 25 kg
- BDC-187PLP-UD | BDC-44

CAPTURES 80-90% OF DUST

The BPS-LP-0022 pre-separator captures 80-90% of the dust created by the machine before it goes to the dust collector. That's why it can triple the lifetime of the dust collector's filters.

LONGOPAC SYSTEM

Our Longopac system allows you to collect the dust in easy to handle packages of 25 kg without dispersing dust.

UP & DOWN SYSTEM

The BPS-LP-0022 pre-separator is equipped with an Up & Down system: 1 position for transport and 1 position for operations.

EASY TO TRANSPORT

The BPS-LP-0022 Blastrac pre-separator is equipped with four handles on the base of the frame for easy transportation upstairs and on to vehicles.

SUITABLE FOR:

BDC-187PLP-UD

BDC-44
